HOPE FOR TOMORROW

GIVING HOPE

Hope for Tomorrow team preparing for a free dental clinic in the Washington D.C. area (Fall 2017).

About Hope for Tomorrow

Established in 2005, Hope for Tomorrow is a 501(c)(3) non-profit organization based in Rockville, Maryland. Hope for Tomorrow (HFT) started with a small group of friends who wanted to give back to the community because they have been blessed with generosities from their newly adopted home – America. In the spirit of friendship and giving back, Hope for Tomorrow started with a few friends which grew into a group of 200+ dedicated volunteers and growing. Hope for Tomorrow is committed to a 100%-volunteer managed and operated non-profit organizations.

Hope for Tomorrow's mission is to provide healthcare, human services, infrastructure build outs and educational assistance to the disadvantaged communities. Hope for Tomorrow organizes and runs numerous programs to serve those in need. The programs includes the following :

1. International Dental & Medical Missions
2. Domestic Dental Missions
3. Infrastructure build out
4. Educational assistance
5. Human services
6. Special projects

Love

Giving Hope Through The Years

Letter from the President of Hope for Tomorrow

Hope for Tomorrow (HFT) was founded by a circle of three friends. The three friends wanted to give back to their community because they believe they were blessed and the blessing needs to be shared with others. From the very origin of Hope for Tomorrow, the cornerstone giving back through “Giving Hope” was the basis for helping those in need.

As we gathered together to celebrate “Giving Hope” in this beautiful Grand Ballroom of the MGM Hotel at the National Harbor, I was awestruck at the number of people who came out to support Hope for Tomorrow. This is the first public event Hope for Tomorrow hosted post Covid. From the end of 2019 to 2024, Hope for Tomorrow continues to work and give hope to the community through an array of projects. Here is a short list of accomplishments:

Covid years:

- Provided needed personnel protective equipment (PPE) such as disposable facemask, protective gowns to Fairfax county hospital, Loudoun county public health center, homeless shelters in Frederick, Maryland and other public institutions.
- Provided PPE to churches, temples and non-profits in the Washington D.C. metropolitan area.
- Raised funds to help flood victims in the Central areas of Vietnam.
- Raised funds to purchase and distribute food essentials such as rice, sugar, fish sauce, cooking oil and instant noodles to isolated communities ravaged by Covid.

Post Covid years to present.

- Hope for Tomorrow helped two organizations in Texas conduct two domestic free dental clinics based on the HOPE model.
- Completed the building of the Vi-Hoang Senior Center in Saigon, Vietnam
- Fundraise to help refugees of the Ukraine war.
- Completed the 2023 International Dental and Medical mission to Vietnam.

As an organization, Hope for Tomorrow is still growing. The organization needs all forms of support. Most importantly, HFT needs energetic volunteers to take on leadership roles and other funtions. We urge you to join the Hope community, volunteer, and make a difference.

HFT Team receiving a $1 Million Dollars grant check from DND. (L-R) Dr. Quyen Dang, Dr. Thi Nguyen, Mr. Loc Duong and MC Nguyen Cao Ky Duyen

DND Grants

On May 26, 2018, the Hope for Tomorrow team consisting of Dr. Thi Nguyen, Dr. Quyen Dang and Dr. Thu Anna Able traveled to Minneapolis, MN to attend the Paris By Night show. At the Paris by Night show, the Hope for Tomorrow team was presented with a grant check for $1,000,000 (one million dollars) from Daisy Nail Designs (DND) by Mr. Loc Duong, CEO of DND.

Hope for Tomorrow would like to express its deepest gratitude to DND and Mr. Loc Duong. The tremendous generousity of DND and Mr. Loc Duong will greatly increase the programs and services offered by Hope for Tomorrow to serve those in need.

The $1 million dollar grant from DND helped support the following projects and services.

Projects:
1. Kinh 7 Charity Clinic - DONE
2. Naza Senior Center & Hospice - DONE
3. Education Support Program - In-Progress
4. Dental Equipment & Tools Upgrade - DONE
5. Building Bridges Project - DONE
6. Water Filtration Systems - DONE
7. Phat Buu Orphanage - DONE
8. HFT Building Schools Project - DONE
9. Youth Leadership & Training - DONE
10. Compassionate Service Society Youth-DONE

IMPACT. Since 2005, HFT has hosted over 15 international dental and medical missions. In total, the mission team has provided treatment to over 40,000 patients, render close to 100,000 dental procedures and helped improve the dental health of the community through dental hygiene classes.

MISSIONS - International

Dental & Medical Missions

Project Lead: HFT Board Members

In 2005, Hope for Tomorrow hosted its first international dental and medical mission to Da Nang, Vietnam. The 2005 mission provided the foundation bedrock upon which Hope for Tomorrow was built. Today, one of Hope for Tomorrow's primary programs is the international dental and medical missions to help the disadvantaged communities.

Currently, the Hope for Tomorrow team concentrates its international mission works in Vietnam and Cambodia. The mission provides free dental and medical care to those who do not have access and cannot afford the care.

In order to provide care to the less fortunate, the Hope for Tomorrow team has collaborated extensively with other non-profit organizations such as the Order of St. Camillus in Saigon, Vietnam, L'Association Vietnam Entraide et Solidarité in Paris, France and many others.

Mar. 17, 2018. Free dental clinic, Howard County, Maryland. Members of HFT team giving Mr. Allan H. Kittleman (black jacket), Howard County Executive a tour of the clinical area.

MISSIONS - Domestics

Dental & Medical Missions

Project Lead: Dr. Anna Able & Dr. Thi Nguyen

In 2014, the Hope for Tomorrow (HFT) team decided to host free dental clinic days in the Washignton D.C. metropolitan area. With the experience gained from conducting numerous international dental and medical missions, the team was ready to use their knowledge and skills to serve people in the USA.

Each year, the HFT team host about four free dental clinics to help the disadvantage communities in the Washington D.C. metropolitan area. The majority of the free dental clinics is hosted in Maryland or Virginia.

The HFT team started engaging with local and State government to create a public/private partnership to deliver dental care to the marginalized community.

The HFT team worked closely with the Howard County, Maryland government to host a free dental clinic day in Laurel, Maryland. HFT teamed up with Loudon County, Virginia to host a free dental clinic day in Leesburg, Virginia.

In the coming years, HFT is looking to collaborate with more partners to deliver needed dental services and improve oral health.

Upcoming domestic dental mission:
Prince George County, Maryland - Fall 2024.

IMPACT. Orphans with HIV/AIDs is challengign to care for due to their medical needs. The Mai Tam orphanage provides a safe and nurturing heaven to help the kids.

Infrastructure

Mai Tam Orphanage

Project Lead: Dr. Chuong Phan

In 2008, the Mai Tam Orphanage for children living with HIV/AIDS opened its doors. The Mai Tam House of Hope, also known as Mai Tam Center, is a home and center for HIV/AIDS positive widows, mothers, and children. The center provides shelter, medicine, medical care, education, and a safe haven for its residence.

Today, the Mai Tam Center, the first and still the only facility of its kind in Saigon, Vietnam, supports more than 500+ women and children in need. In addition to providing emotional and physical support, the center provides vocational training to help its residents become more independent and improve their self esteem.

As the children grows, the challenge of entering school, growing up and ask for more space is becoming a good reality.

Due to increasing demand to support orphans who are HIV/AIDS+, the Hope for Tomorrow team continues to collaborate with the Order of St. Camillus in Saigon to open Mai Tam Orphanage II. In 2016, the HOPE team completed building the Mai Tam Orphanage II.

IMPACT. The facility and staff provides needed care for patients who cannot afford the care. A young mother taking her son to Gary House for assistance with cancer treatment.

Infrastructure

The Gary House

Project Lead: Dr. Chuong Pham

The Gary House was fashioned after the Ronald McDonald house for patients undergoing cancer treatment and their family. The Gary House opened its doors in 2014 Saigon, Vietnam. From January 2014 to present, the Gary House has served over 800+ patients.

The Gary House provides the following to its patients:

- Free boarding and lodging for children and their family members while undergoing cancer treatments.
- Free transportation and treatment support for poor children with serious illnesses
- Improve quality of life for the children through education, games, social and spiritual support.
- Provide hospice care for the children towards their last stage of life.
- Counseling, health education and grief-care for family members.

IMPACT: Providing food, housing, medical treatment, and pyschological support to those in need

Infrastructure

Naza Senior Center & Hospice

Project Lead: Dr. Chuong Phan & Dr. Anna Abel

In Vietnamese tradition, children will take care of their parents when the parents gets older. What happens to older adults who do not have family members to help them. The older adults needs care and understanding.

Understanding the needs to care for older adults, the Hope for Tomorrow team is helped build a senior center to care for older adults and provide a greater quality of life as they grow old.

There is a real need for palliative care wards and programs to serve the older population. However, there are currently only a handful of hospitals or clinics which include palliative care services. Palliative care aims to improve the quality of life for patients suffering from deadly diseases. It focuses on reducing pain while increasing comfort and dignity.

Palliative care is still a relatively new concept in Vietnam. As the demand continues and the value of end-of-life comfort is realized, it is quite likely these programs will continue to appear across the country.

IMPACT: Providing treatment/services for free or highly discounted cost to those in need

Infrastructure

Kinh 7 Charity Clinic (DONE)

Project Lead: Dr. Chuong Phan

The Kinh 7 Charity Clinic is located in Rach Gia, Kien Giang Province, Vietnam. The clinic was established in the 1980s to serve the disadvantaged communities in the area. In the past decade, the clinic has expanded its foot prints and provided additional services to those seeking medical care.

The uniqueness of the clinic is the incorporation of both Eastern and Western medicine to help the patients recover. In addition, a strong interfaith community shares in various aspects of helping to run and manage the clinic.

Fundings was provided by DND and HFT to help build a new hosptical wing. The new wing include additional hospital beds for in-patient, a dental clinic with two dental chairs, and other expanded services to help the patients.

IMPACT: Providing clean potable water helps reduce water borne illness and prolong life. Clean potable water is free. Residence makes donations when they pickup clean water from the water station.

Infrastructure

Water Filtration Systems

Project Lead: Loc X. Nguyen

663 million people in the world live without clean water. That's nearly 1 in 10 people worldwide. Or, twice the population of the United States. The majority live in isolated rural areas and spend hours every day collecting water for their family. Not only does walking for water keep children out of school or take up time that parents could be using to earn money, but the water often carries diseases that can make everyone sick.

Diseases from dirty water kill more people every year than all forms of violence, including war. 43% of those deaths are children under five years old. Access to clean water and basic sanitation can save around 16,000 lives every week.

Access to clean water means education, income and health - especially for women and kids. The installation of water filtration systems at strategic geographical locations can help provide access to clean and safe drinking water.

Updates: (Kontum & Khanh Hoa province)
3 Water wells drilled
3 Water filteratopm systems
Cost $12,000

IMPACT: Provides students with a better learning environment, more knowledge enrichment and a chance for a brighter future.

Infrastructure

School of HOPE

Project Lead: Loc X. Nguyen

In Vietnam, primary school education is compulsory for all children.The country's literacy rate is over 90%. Elementary school education is free. The cost of tuition, books, and uniforms and the need to supplement family income are the two main reasons for dropping out. A huge disparity exists in primary school enrollment between the cities and rural parts of Vietnam. In some rural areas, only 10 to 15 percent of the children progress beyond third grade, whereas almost 96 percent of pupils in Saigon complete fifth grade.

In remote rural areas, the schools are poorly built and ceates a hazard for students.

The School of HOPE is a program to help build single room or double room schools to create a safe learning environment for the students. HFT will wok in collaboration with others to build the schools. The location selected will generally be in remote rural areas. Contact the project for more information.

New school dedication plaque.
Tra Cang Kindergarten School. Est. 2019

IMPACT: Provides a safe environment where children and adults feels love and valued. Students can learn in a clean and caring atmosphere.

Infrastructure

Phat Buu Orphanage

Project Lead: Hung Nguyen

Phat Buu Orphanage (Mái □m Chùa Ph□t B□u) is located in Nha Trang, Khanh Hoa Province, Vietnam. The orphange is home to 70+ children and 10 older adults. The orphans are in the care of Buddhist Nun Nguyên T□nh. Like the orphans, the older adults do not have any family to care for them. Nun Nguyên T□nh and her staff are the only people caring for them.

The Hope for Tomorrow team is working with the Phat Buu Orphanage to build out a multi-purpose room which will serve as a classroom for the children, activities room for both children and adults and an area for other activites.

Currently, the Phat Buu Orphanage does not have adequate space to accommodate all the orphans, adults and their activities. The construction of the additional space is greatly needed.

IMPACT: Bridging lives and giving the school children a safe route to and from school. These concrete bridges helps improve transportation and improve the safety of the community.

Special Projects

Building Bridges (on going)

Project Lead: Dr. Quyen Dang

Everyday countless numbers of people use poorly constructed bridges to travel from one place to another. In rural areas like the Mekong Delta region, the locals created Monkey Bridges as a means to cross small streams or gully. A c□u kh□ ("monkey bridge") in Vietnam is a handmade bamboo or wooden passway across a stream or gully.

In the remote areas of Vietnam, children literally put their lives in jeopardy to attend school. Especially in the monsoon season, which lasts for months, students needs to cross rivers on perilous monkey bridges. Building well constructed foot bridges allows kids a safe journey to school.

The HFT team established a special project to help replace old monkey bridges with concrete foot bridges built with reinforce steel. The bridges can accommodate foot traffic and motorbikes.

1. Cau Kenh 3 – City Kien Giang 29m x 2.7m.
Cost. $10,000. Sponsor by Mimi Ton family.
Serves 435 families.
2. Cau Duc Thinh, Bac Lieu City. 24m x 3m.
Cost $8000. Sponsor Chiaramonte Construction
Serves 316 families.
3. Cau Ba Thong – Dong Hai Bac Lieu
Cost $8500
Serves 463 families.

IMPACT: HFT education support program partnered with VietHope to provide education assistance to students. This gave students an opportunity to realize their potential and helped to shape a brighter future.

Services

Education Support Program

Project Lead: Chau Nguyen & Hung Nguyen

Hope for Tomorrow is working with VietHope, Viet Toc and other non-profits to provide needed academic support to undergraduates and graduate students.

The education support program goals is to inspire students to cultivate free, independent and creative thinking while fostering greater ethical conduct and a sense of social and environmental responsibility. The HFT team provides grants to the students via collaboration with numerous non-profits. HFT education support team members also provide mentoring and career advising. is able to assist more students

Success Story. Mr. Le Phu Dong received HFT Education assistance in 2006. Today, Mr. Dong is the Program Director for VietHope. He manages the program to assist students.

IMPACT: With the right tools for the job, the process of delivering and provide care for those in need is made a little easier.

Services

Dental Equiment Upgrade

Project Lead: Dr. Anna Thu Abel

Whether building a new dental practice from scratch, upgrading an existing practice or expanding a practice, numerous pieces of dental equipment will be needed to complete the project. Beyong the technologies used to treat patients, dental equipment includes the utility systems that power a dental practice, the systems used for infection control protocols, and all of the equipment used to set up a portable dental operatory.

The tools and equipment used by the dental team is in dire need of an upgrade and moderniation. With the grants received from DND, the dental team is able to procure more robust and portable dental equipements to make setting up mobile dental operatories easier.

HFT extends the usefulness of the portable dental units but lending the equipment out to other non-profits to use for their domestic dental mission. Currently, the HFT dental team helps provide support for two non-profit organizations in Dallas and Houston, Texas.

Impact: A senior adult living by themself could face a multitude of difficulties and needs. The HFT Senior Support program provides emotional support, food and clothing and someone to care for them.

Special Projects

Children & Senior Support

Project Lead: Loc X. Nguyen

Hope for Tomorrow volunteers in Vietnam called themselves the “Friends Group” gathers monthly to provide financial and material supports to very poor senior citizens living in remote areas and extreme conditions. The majority of the seniors who receives care do not have any family members or children to care for them.

Through the Senior Support program, the Friends Groupd is able to provide urgent medical and dental care, materials for daily life such as blankets, clothing, food and other provisions. The team helps provides emotional and spiritual support throught weekly interactions.

Compassion House Project team prepares to presents a newly constructed home to a resident in the Mekong Delta region. (TOP) The family living in their original house.

Special Projects

Compassion House (on going)

Project Lead: John Donovan & Thang Do

The ”Compassion House Project” was started by Mr. John Donovan. Mr. Donovan is a Vietnam Navy Veteran who served in the Mekong Delta during the war. Mr. Donovan returned to the Mekong Delta and helped build 70 new homes for poor farmers earning less than $5.00 a day.

Compassion House Project provides housing and educational assistance in the Mekong Delta region of Vietnam. Compassion House Project continues with a special focus on upward social mobility. This is accomplished by supporting families where the parents are committed to keeping their children in school with the intention and hope that the children will go onward to obtain a college education.

Compassion House Project will support 10 families each year with new homes, micro financing and health care that will ultimately enable them to break the poverty cycle. Compassion House Project is an all-volunteer organization and every penny goes directly to the people in need. A new home and educational support costs as little as $1,500 dollars per family. Note: Building material cost is subject to change due to inflaction.

HFT Board of Directors
(2020 - 2025)

DR. DUC LE (President)

Dr. Duc Le was elected to take charge of Hope for Tomorrow pre-Covid. During the Covid years, Dr. Le helped HFT move forward and provide the necessary services and support the community needed. Dr. Duc Le serves as the Emergency Medical Response coordinator for all international and domestic missions. In his spare time, Dr. Le is a champion Pickle Ball champion and will travel the distance for a good game of Pickle Ball.

DR. QUYEN DANG (Vice President / Director of Special Projects)

Dr. Quyen Dang is Vice President and the Director for Specials Projects. Dr. Quyen's specialty is putting together ad-hoc projects to help those. Dr. Dang is working on his second career as MC Dang with Dang Entertainment Enterprise. For leisure, you will find Dr. Quyen playing at the Victoria Square Champion Pickle Ball Amateur Pro Club. Get your paddle and ball ready for the next game with MC Dang.

MR. HUNG NGUYEN (Vice President / Director of Finance)

Mr. Hung Nguyen is the Director of Finance. Mr. Hung has been with HFT team since 2005. He participated in HOPE Mission #1 in 2005. In his leisure, Mr. Hung is an amateur-professional master chef operating the Chef Hung Ghost Kitchen in Tyson's Corner. During off hours, you can catch Mr. Hung walking the greens at the Westwood Country Club. His culinary skills and amateur-pro golf standing has earned him the title of Golfing-Iron Chef of Tyson's Corner.

DR. ANNA ABEL (Secretary & Dental Director)

Dr. Anna Thu Abel aka Anna Smiles has been with HFT for over two decades. One of Dr. Anna's primary roles is to serve as the HFT Dental Team lead and chief recruiter for dental talents. Dr. Anna is dedicated and passionate about charity works. Dr. Anna is part of the Victoria Square Champion Pickle Ball Amateur Pro Club. Watch out for her back swing and pickle ball slicing styles.

DR. THI NGUYEN (Immediate Past-President)

Dr. Thi Nguyen is the Immediate Past-President of Hope for Tomorrow. During her tenure, Dr. Thi helped establish the vision and modernization goals to grow the organizations. Previously, Dr. Thi held the position as treasurer. For leisure, Dr, Thi is known to host numerous lectures on the many unique uses of the dental laser tools. What can you do with the dental laser? Its a multi-function tool in the hands of Dr. Thi. Distinguish member of the Victoria Square Champion Pickle Ball Amateur Pro Club.

MR. THANG DO (Treasurer)

Mr. Thang Do is the Treasurer and Quarter Master for Hope for Tomorrow. Mr. Thang was the third President (2015-2017) elected to lead the HFT team. In his spare time, Mr. Thang is known to be an amateur myth buster and tinker extraordinare. As a seasoned engineer, Thang can re-engineer anything you might need/want or not want. During his tenure (2015-2017), Thang helped ushered in a new era of partnership betweeb HFT and organizations such as Howard County, Maryland's Department for Community Partnership, Asian American of Frederick, Maryland and others. Favorite drink: Gentlemen Jack.

MR. LOC X. NGUYEN (Chief Engineer)

Mr. Loc X. Nguyen is the real "Q" for the HFT Team. He wears multiple hats and engages in various roles to help HFT grow. As Chief Engineer, Mr. Loc will help manage the HFT operation and help identify potential growth opportunities. Previously, he helped manage all HFT's records, financial needs and sets budget forecast for the year. Mr. Loc Nguyen is best known for his role as Chief Engineer and primary logistics coordinator for domestic coordinator. Founder of the Victoria Square Champion Pickle Ball Amateur Pro Club.

DR. CHUONG PHAN (Director of Compliance/Ethics)

Dr. Chuong Phan is the Director of Compliance/Ethics. Dr. Chuong was the second HFT President from 2012 – 2014. Dr. Chuong is an avid writer and known for his literary masterpieces. To help advance the dental community, Dr. Phan gives dental and ethics topics talks for the dental community in the Washington D.C. metropolitan area and other regions. Dr. Phan serves as Vietnam country expert on topics relating to dental health, human services needs and caring for the senior community. Dr. Phan was last scene performing a the Kennedy Center. For leisure, Dr. Phan is trained as a traditional Hue Folklore Actor.

MR. CHAU NGUYEN (Community Relations)

Mr. Chau Nguyen has been with HFT since its founding days. As Director of Community Relations, Mr. Chau is responsible for community liason activitiies, participating in various outreach activities and helping maintain important history records. Mr. Chau is working diligently to establish more partnerships between Hope for Tomorrow and Local/State/Federal entities. Mr. Chau is still trying to graduate from school. Mr. Chau hopes to graduate very soon.

HOPE Futures

Next Generation of Giving Hope

From its inception in 2005, Hope for Tomorrow has been growing steadily. From all the programs and services provided, the purpose has always been about “Giving Hope”. As the organization matures, it is essential for the organization’s leadership to think forward and plan for the next generation. In the next five years, the Hope for Tomorrow team will start the succession plan process and gradually transition Hope for Tomorrow to a more able and strong team of young and energetic team. Are you prepared to help push Hope for Tomorrow to another level? Come be part of Hope for Tomorrow and continue “Giving Hope”.

Hope for Tomorrow Board of Directors (L-R): Mr. Thang Do, Mr. Chau Nguyen, Dr. Quyen Dang, Dr. Thi Nguyen, Mr. Loc Nguyen, Dr. Anna Abel, Dr. Chuong Phan, Dr. Duc Le, & Mr. Hung Nguyen

2018 International Dental & Medical Mission to Kinh 7, Rach Gia, Vietnam

In the summer of 2018, The Hope for Tomorrow team hosted an international dental and medical mission to Vietnam. From July 18 - July 30, 2018, the mission team worked in Saigon and Rach Gia. The mission team consisted of 80 volunteers (both local Vietnamese and international members). The volunteer team included 21 medical and dental professionals and 58 volunteers to handle logistics and mission management. The team successfully delivered needed dental care and medical examinations to nearly 1400+ patients with an estimated value of $461,911 in services rendered. The dental services delivered included: restorative; extractions; prophylaxis or debridement or scaling root planning, and fluoride. The mission team also provided provisions such as rice, sugar, cooking oil and instant noodles to needy families in Rach Gia, and Tra My areas.

About the HFT Logo

Vietnam has three distinct regions: North, Central, and South. The Northern parts of Vietnam was the geographical origin of ancient Vietnam. The Central region is best characterized by the Vietnamese Imperial Courts. The Southern region is characterized by the rice paddies and extensive farm lands. These collective characteristics are embodied in the Hope for Tomorrow logo.

The HOPE logo has three distinct colors - red, yellow and green. Red symbolizes the combine heritage and bloodline that all Vietnamese shared. Based on the mythical Vietnamese genesis story, all Vietnamese are descendants of Âu C□ and L□c Long Quân. Yellow represents the Vietnamese Imperial Courts located in Central Vietnam. Green represents the extensive rice paddles and farm lands of South Vietnam.

Spiritually, the three figures holding hands have different meaning based on your belief. For Christians, the three figures holding hands represents the Holy Trinity: The Father, The Son and the Holy Spirit. For Buddhists, the three figures holding hands represents the three treasures: The Buddha, The Buddhist Cannon, and the Sangha (Buddhist community of monks).

The HOPE logo is the embodiment of the UNITY of HOPE, LOVE and COMPASSION. GIVING HOPE.
